Premium quality
from the heart of
Switzerland.

Climate:
Pure, hygienic freshness
to help you sleep soundly.

Ergonomics:
Coordinated sleeping
systems for perfect,
stress-free support.

275

YEARS

1748 – 2023

This year we are celebrating our 275th anniversary. It was way back in 1748 that Johannes Roth established his small and completely new type of horsehair spinning mill in Wangen an der Aare. Roth then began processing horsehair into upholstery material for mattresses and seats in an extremely simple operation. Over the next 275 years, he and the generations who followed him performed pioneering work that enabled countless numbers of people to get a good night's sleep. They worked hard and untiringly to continuously design and develop new and innovative sleep systems that guarantee blissful sleep.

These days, we are committed more than ever to ensuring a healthy good night's sleep. Our top priority is to deliver products of the highest quality that offer you a sleep experience that is both relaxing and enjoyable.

When you choose roviva, you're choosing not only 275 years of bed-making craftsmanship that uniquely combines tradition and innovation; you're also choosing the best materials, the latest technology and the utmost care. In addition, you're honouring Swiss workmanship and an independent family business that's now in its 9th generation, not to mention supporting an approach to sustainability that benefits people, conserves resources and protects the environment.

We invite you to celebrate with us! We wish you a wonderful and relaxing night's sleep with roviva!

Peter Patrik Roth
CEO and owner in the 9th generation

6

WHERE IT ALL BEGINS

The story starts in the heart of Switzerland.

10

TRADITION

Passion for our craft for nine generations.

12

HANDICRAFT

With the utmost care and the finest materials.

14

SLEEP FROM A TO ZZZ

Sleep is essential for health and well-being.

**16 MATTRESS: ROVIFEEL**

An end to stresses and strains.

YOUR SLEEP SOLUTION

Good to know when choosing a sleep system.

Philippe Suarez, Lucens

SWISS MADE AT ITS BEST

In the heart of good, old Europe lies the small country of Switzerland with approximately 8.5 million inhabitants. It is famous for its snowy mountains, clean air, delicious chocolate, aromatic cheese, accurate clocks, innovative high tech products, and, of course, the highly comfortable roviva mattresses.

Maja Strasser, Solothurn

FROM THE HEART OF SWITZERLAND

Right at the heart of Switzerland, you will find the place we call home: Wangen an der Aare, in the canton of Bern. A lot has happened over rovia's 275-year history. What started in 1748 as a spinning mill for horse hair is now a leading company for innovative sleep systems. But one thing that hasn't changed is our strong connection with the region.

STRONG TRADITION BUILDS A BRIGHT FUTURE

At rovia, we have made premium quality our tradition. As an independent, family-run company now in its ninth generation, we have always been dedicated to the art of sleep. In everything we do, we are guided by our philosophy of using our experience and our pioneering work to offer the very best sleep solutions to each and every customer.

MANUFACTURING WITH PASSION

Our attention to detail and love for our products shines through. Our 65 employees work with the utmost care and precision, using their wealth of expertise to produce our top-quality mattresses and sleep systems. They are true specialists and have a thorough understanding of their craft. This passion is reflected in more than just the products.

Sleep from A to ZZZ

PUTTING PEOPLE FIRST

The individual is key – after all, real people provide us with important information. We tailor our mattresses, system frames, duvets and pillows to individual wants and needs, for everything from ergonomics through to climate aspects. We can even offer individual solutions depending on how you tend to move around during the night. Developing the perfect bed for every one of our customers, whatever their individual wishes and requirements, is a challenge that truly excites us.

ROVIVA MATTRESSES – A WEIGHT OFF YOUR MIND AND BODY

Our mattresses take every aspect of the human body into consideration, down to the very last detail. This means that we can offer smart solutions whatever your sleeping habits. The high resilience of our mattresses enables them to take the strain off your body and provide stability, so that you can enjoy complete freedom of movement while sleeping. What's more, a wealth of additional innovations mean even more benefits for you.

ROVIVA SYSTEM FRAMES – FEEL SUPPORTED

The roviva system frame is the foundation of our beds. The high degree of spring deflection and the elastic tension force of the slats guarantee that the body is optimally balanced. If your sleeping habits change, the frame can be easily adapted to this new situation – either manually or using a mechanically driven system.

ROVIVA DUVETS & PILLOWS – TOTAL RELAXATION

Our duvets and pillows have been designed with a number of important aspects in mind, such as climate, weight, hygiene and – in the case of pillows – level of support. The duvets and pillows are filled with fluffy goose down, which gives them plenty of volume and excellent support.

rovifeel

1313

CORE AND COMFORT

Highly flexible mattress core made from breathable Porotex with air cell structure and anatomically profiled support and strain relief zones. New elastic shoulder support. Viscoelastic Feelingpur lining with strain relief on both sides, with memory effect and three-dimensional surface profile design. Important information

MATTRESSES

Intermediate sizes: next-largest size plus a 10% surcharge.

Outsize dimensions: widths of more than 180cm are converted from the base price to the effective size plus a 15% surcharge.

Example for a width of 200 cm:

$$\frac{\text{Price for 180 cm}}{180} \times 200 \times 1.15$$

Rounded corners: manufactured using a template; only available for mattresses with the GrandeHygiène finish and HypoAllergen (dream-away impérial, dream-away climaxx, dream-away air space, dream-away byblos).

SYSTEM FRAME/SPRING SYSTEM

Intermediate sizes: next-largest size plus a 30% surcharge.

Outsize widths: not available.

Rounded corners: not available.

OTHER

Please note that minor variations in the stated dimensions of up to 2% are possible owing to the mattress materials. Do not use a fitted bedsheet that is too small, as this will compress the mattress. Store mattresses horizontally.

Natural variations in textile materials may cause slight colour differences. Wood is a natural product. Every tree is unique: variations in the wood colour or grain, intergrown knots and small cracks in the wood give the bed its unique, natural character.

In the warranty information, you will find tips on how to care for your mattress. Washable mattress covers should be washed at no hotter than 30°C on a gentle cycle with a laundry detergent designed for wool.

To clean your system frame or bed, we recommend simply wiping with a dry or slightly damp cloth. Do not use cleaning agents or wood polish.

All information provided is non-binding. rovia reserves the right to make technical changes, or any other type of changes, at any time.

QUALITY GUARANTEE

Products from rovia are made from top-quality raw and base materials. In combination with careful processing, regular quality controls and recognised internal and external safety tests, this results in quality products and services that do exactly as they promise.

FULL WARRANTY

Under normal usage conditions, we grant a warranty of 10 years which guarantees that the mattress and the system frame and/or spring system will remain usable throughout this period. The warranty covers material defects and manufacturing faults. The full warranty lasts for 2 years. If repairs or replacements are required from the start of the third year onwards, the warranty claim reduces by 10% per year from the date of manufacture (pro-rata warranty to 10 years). For system frames with electrically adjustable components, including drives, remote controls and beds, we grant a 2-year full warranty.

Please read the detailed warranty conditions included with your product.

MADE IN SWITZERLAND

For rovida, "Swiss made" is a quality promise that we commit to every single day – with our years of experience, our wealth of expertise and plenty of passion. At our workshop in Wangen an der Aare, Swiss quality products of the very highest value are produced to meet the most exacting demands.

papillon comfort pillow

The ergonomically designed rovia papillon comfort pillow softly cradles your head like a cloud. Its butterfly shape helps you achieve an ideal sleeping position, whether you prefer to sleep on your side, back or front.

ERGONOMIC SUPPORT

The comfort pillow has two shoulder sides of different lengths, with recessed areas of varying sizes. On one side, the section between the shoulder and pillow is narrower, providing stability for the neck. On the other side, this section is broader, providing plenty of space for sleepers with broader shoulders and necks. The lowered section in the middle of the comfort pillow guarantees that your head will stay in an ideal central position. The curved sides of the pillow, which slope away slightly to the edges, mean that you can breathe freely when lying on your side. The range of different core types available in the rovia papillon offer gentle strain relief and perfect support for your head and neck.

ALL NATURAL

The exceptional point elasticity of 100% natural Hevea latex offers the very softest sleeping sensations. Its dynamic supportive action always creates the perfect position for your head and neck. The natural latex surface, with an air-vent design that features multiple ventilation points, keeps the pillow cool and refreshing.

papillon nature COMFORT PILLOW

Core: 100% natural Hevea latex with air-vent surface. **Cover:** case design with silky-soft, double-stretch botanic viscose (pattern 434). Casing with zip closure, removable, washable at up to 60°C. **Comfort:** for side, back and front sleepers.

WIDE AWAKE FOR OUR CUSTOMERS

For more than 270 years, we have been in pursuit of the perfect night's sleep. Our experience forms the basis for our innovations, which focus on the central elements of a good sleeping system. These include: a natural experience, the hygiene concept, climate regulation, comfort, and expertise in ergonomics.

dream-away – fabulous duvets and pillows

The crowning glory of the dream-away sleep system. The new duvet and pillow from the dream-away series is the crowning glory of your sleep system and goes together perfectly with your mattress and contour bed frame. The light-as-a-feather duvet caresses your body and ensures a pleasant and wonderfully balanced bed experience. The pillow gently supports your head. Indeed, roviva dream-away guarantees a beautiful night's sleep.

DOWN FROM MASURIAN FREE-RANGE GEESE

We treat all animals with respect, and our species-appropriate animal husbandry approach also has a positive effect on the quality of our down. Our big-fluffy down fillings come from free-range geese in the Masurian Lake District in Poland. The geese are raised on small farms where there is no force-feeding or live plucking. We guarantee that this is the case with our Downpass Certificate and the Swiss Guaranty VSB seal of quality.

NATURAL CLIMATE CONTROL

Natural down and small feathers are among the best filling materials for bedding. With their millions of air chambers, the fine branches in the down and small feathers ensure a permanent balance between warm and cool and dry and damp. It's the ideal climate for under the covers!

AIRY AND LIGHT AS A SNOWFLAKE

We use big-fluffy down from free-range geese for our high-quality dream-away duvets and pillows. This down material is quite big, has millions of fine branches and is so airy that it practically weighs nothing at all. The filling performance of this wonderfully light down material guarantees a fluffy feeling of well being.

The perfect bed experience
from head to toe

THE RIGHT THERMAL GRADE

Do you like things a little cool when you're in bed, or do you prefer to snuggle up warm? You can pick the right duvet for your preferred "heat index":

1/cool: For sleepers who aren't much sensitive to cold at all and/or those who sleep with the heat on. Also suitable for use with waterbeds, or in summer.

2/medium: For sleepers who are somewhat sensitive to cold and/or those who sleep with the heat on. Also suitable for use with waterbeds.

3/warm: For sleepers with average cold sensitivity and/or those who sleep with just a little heat in bedrooms with normal insulation.

4/extra-warm: For sleepers who are highly sensitive to cold and/or those who sleep in cool bedrooms.

THE RIGHT SUPPORT STRENGTH

Your pillow should support your head and thus ease the strain on your cervical spine. You can pick the right pillow for your needs:

1/soft: Light pillow filling – suitable for front and back sleepers.

2/medium: Average pillow filling – suitable for front, back and side sleepers.

3/firm: Heavy pillow filling – especially suitable for side sleepers, as well as sleepers with broad shoulders who use firm mattresses.

HYGIENICALLY FRESH IN BED

Like the mattresses in the dream-away line, the dream-away duvets and pillows also offer the hygiene benefits of rovia Silver-skin^{Ag}. Here, tiny silver ions woven into the soft cotton-fine satin material naturally repel micro-organisms such as dust mites, bacteria and micro-fungi. This hygiene-enhancing function is completely harmless from a toxicological point of view, complies with the requirements for Öko-Tex Standard 100 Class 1 certification and has excellent washing properties.

dream-away pillow

5441

DESIGN

Luxurious and supportive 3-compartment down pillow with an extra-soft surface and an elegant side insert for optimised filling. Available in 3 different support strengths for front, side and back sleepers.

SUPPORT STRENGTH

soft	medium	firm
		
1	2	3
5440	5441	5442

FILLING

Outer compartments: New big-fluffy down exclusively from geese (white), 90% down, 10% small feathers. **Inner compartment:** New pure down exclusively from geese feathers (white), 100% small feathers. Exclusive quality from Masurian free-range geese. Certified in accordance with Downpass and Swiss Guarantee VSB.

CASE

Soft breathable fine satin, 100% cotton with hygiene benefits in the form of Silverskin^{AG}, which protects against mites, bacteria and their allergens; washable up to 40 °C. Öko-Tex Standard 100.

dream-away duvet

5439

DESIGN

High-quality, climate-balancing down and cassette stitched duvet for airy fine down distribution. Available in 3 thermal grades for all sleepers – i.e. from those who are somewhat sensitive to cold to sleepers who are highly sensitive to cold.

THERMAL VALUE

Soft breathable fine satin, 100% cotton with hygiene benefits in the form of Silverskin^{Ag}, which protects against mites, bacteria and their allergens; washable up to 40 °C. Öko-Tex Standard 100.

Bedding for children

5434/5443

PICCOLO DUVET 5434

Filling: New big-fluffy down exclusively from geese (white), 90% down, 10% small feathers. Exclusive quality from Masurian free-range geese. Certified in accordance with Downpass and Swiss Guaranty VSB. **Case:** Soft breathable fine satin, 100% cotton with hygiene benefits in the form of Silverskin^{Ag}, washable up to 40 °C. Öko-Tex Standard 100. Cassette-stitched.

PICCOLO PILLOW 5443

Filling: **Outer compartments:** New big-fluffy down exclusively from geese (white), 90% down, 10% small feathers. **Inner compartment:** New pure geese feathers (white), 100% small feathers. Exclusive quality from Masurian free-range geese. Certified in accordance with Downpass and Swiss Guaranty VSB. **Case:** Soft breathable fine satin, 100% cotton with hygiene benefits in the form of Silverskin^{Ag}, washable up to 40 °C. Öko-Tex Standard 100. 3-compartment pillow.

1215

PICCOLO LATEX

Core: highly elastic, original 100% natural Talalay latex, height 10 cm.

MODEL GrandEspace 1215

Cover: casing design, removable with zip closure, washable at up to 30°C. Double-stretch viscose (pattern 416). **Upholstery:** 500g/m² climate-regulating cushioning (pure Swiss wool, comfort cushioning).

MODEL WITHOUT UPHOLSTERY 1216

Cover: casing design without cushioning, removable with zip closure, washable at up to 60°C. Double-stretch viscose (pattern 416).

1423

PICCOLO PURE

Core: shape-retaining PU foam, height 10 cm.

MODEL GrandEspace 1420

Cover: casing design, removable with zip closure, washable at up to 30°C. Double-stretch viscose (pattern 416). **Upholstery:** 500g/m² climate-regulating cushioning (pure Swiss wool, comfort cushioning).

MODEL WITHOUT UPHOLSTERY 1423

Cover: casing design without cushioning, removable with zip closure, washable at up to 60°C. Double-stretch viscose (pattern 416).

KNOWLEDGE TO HELP YOU SLEEP SOUNDLY

At rovida, sustainability begins as soon as we set about procuring the raw material. It is woven into our resource-conserving production processes, and finally is an integral part of our premium-quality products, which live out their long lives in bedrooms, where they guarantee a relaxing and natural night's sleep.

6411

MATTRESS COVER GrandPlaisir 6411

Cover: case design with climate-regulating membranes and two zip closures on all sides, detachable, washable at up to 30 °C. Double-stretch viscose (pattern 416). **Upholstery:** 500 g/m² climate-regulating cushioning (pure Swiss wool, comfort cushioning). For the collection model.

MATTRESS COVER HypoAllergen 6404

Cover: special cover for allergy sufferers with zip closure on all sides, detachable, washable at up to 60 °C. 300 g/m² heavy botanic double-stretch viscose (pattern 423). **Upholstery:** 300 g/m² synthetic lining (PES fibrefill hollow fibre, hypoallergenic). For the activa, collection models.

MATTRESS COVER GrandeNature 6415

Cover: luxurious piping with climate-regulating membranes and two zip closures on all sides. Top sheets can be detached and removed separately, washable at up to 30 °C. 500 g/m² heavy, elastic double-stretch viscose cotton (pattern 435). **Upholstery:** 500 g/m² luxury cushioning (pure Swiss wool, climate-regulating cushioning). For the activa model.

MATTRESS COVER basic 6153

Cover: hard-wearing cotton mix mattress quilting, flame-retardant, Trevira CS, blue (pattern 204), with zip closure on 3 sides, washable at up to 60 °C.

BRIDGE OF LOVE 5980

Design: T-shaped cut-out in PU foam for placement between the two mattresses in a double bed. Bridges the gap in the middle.

Size: 15 × 12 × 200 cm

CHF 80.–

FLANNELETTE LINING protect 5200

Design: soft flannelette lining, 100% cotton, pre-shrunk, with all-round cotton strip and four sewn-in rubber corner strips for easy fastening over the mattress. Perfect mattress protection, breathable, washable at up to 95 °C.

FLANNELETTE LINING WITH MOISTURE PROTECTION protect 5220

Design: soft flannelette lining, 100% cotton with polyurethane moisture barrier, all-round edging and four sewn-in rubber corner strips for easy fastening over the mattress. Perfect mattress protection, waterproof and urine-resistant, washable at up to 95 °C.

FLANNELETTE ELASTICATED COVER protect 5240

Design: soft stretch flannelette with elasticated edging, 70% cotton and 30% polyester, double elastic, with all-round rubber strip, for easy fitting and removal. Perfect mattress protection, breathable, washable at up to 95 °C.

MATTRESS PROTECTOR protect 5100

Design: dimensionally stable mattress protector, 100% polyester, with fine point coating and all-round velour textile strip. Perfect mattress protection, fixes the mattress in place, anti-slip, breathable, washable at up to 60 °C.

QUALITY WITHOUT COMPROMISE

We spend a third of our lives asleep. Sleep is much too important for us to spend our nights lying awake in bed. Choosing the right materials is an essential part of creating the perfect sleeping environment. Our experienced specialists are committed to using only the highest-grade raw materials in our quality products.

The diverse ingredients of a perfect night's sleep

PURE SWISS WOOL

100% NATURAL TALALAY LATEX

SWISS ALPACA WOOL

100% NATURAL TALALAY LATEX

Highly elastic natural latex with an incredibly airy and irregular cell structure, produced according to the intricate Talalay method and made entirely from natural rubber from the Hevea brasiliensis tree. This offers excellent sleeping comfort thanks to its point elasticity. It also relieves strain and is extremely soft and cosy. It helps to regulate circulation, and is breathable, antistatic, hypoallergenic and antibacterial. Over 6,000 vertical ventilation points per m² guarantee perfect airflow through the mattress and prevent heat from building up. FSC and Rainforest Alliance certification, as well as Cradle to Cradle gold level certification. In addition, all rubber trees neutralise more than 90 million tonnes of CO₂ per year around the globe. Origin: Netherlands.

100% NATURAL HEVEA AIRPLUS LATEX

Open-pored natural latex with point elasticity, made from pure natural rubber from the Hevea brasiliensis tree. The new, refined latex formulation and novel energy-saving SonoCore production method guarantee a light and airy cell structure with optimum dissipation of heat, cold and moisture. Hevea AirPlus natural latex offers perfect strain relief and dynamic support. Origin: Belgium.

POROTEX PRO

The latest generation of refined premium foam materials features a very open and breathable cell structure. Porotex Pro sets new standards for point elasticity, snugness and climate control. It offers consistent stability and support strength the whole night through, even if heat and humidity increase in the room. Top-notch climate resistance ensures permanent ergonomic support. Porotex Pro is hypoallergenic, antibacterial and CFC-free. Origin: Austria.

FEELINGPUR

This viscoelastic foam is excellent at relieving strain. As a result, it is often found in hospitals, where it provides support to patients who have to remain in tricky positions. Feelingpur is incredibly soft and subtle, and is known for its delayed return to its original shape (memory effect). In the innovative air-vent perforation design, Feelingpur is given more than 1,500 vertical ventilation points per m². This prevents heat from building up. Origin: Switzerland, Germany.

POLYETHER FOAM

Polyether foam is a standard material that has been used for many years in budget-friendly mattresses. The honeycomb-like form and fine cell structure are the reasons behind its light weight. Its varying densities deliver support and comfort. Origin: Austria, Germany.

POCKET SPRINGS

TUSSAH SILK

POROTEX PRO

POCKET SPRINGS

Our interactive pocket spring core consists of thermally refined coil springs, with smooth load-bearing thanks to specially configured spring tension along the longitudinal axis of the mattress. Here, the large air volume inside the pocket springs acts like a bellows. Origin: Germany.

TUSSAH SILK

This fine and soft wild silk is obtained from the cocoons of butterflies native to China and India. Tussah silk is extremely gentle on the skin. It has a powerful temperature-balancing and insulating effect, ensuring comfort and well-being on both hot and cold nights. Its fibres can even take up as much as 30% of their own weight in moisture, meaning they can absorb skin moisture effectively. Origin: India, China.

ALPACA WOOL

Fluffy alpaca wool comes from alpaca camels, whose wool is highly regarded mainly for its very refined and curly structure. Alpaca wool has unique thermal properties. It has a strong temperature-balancing and insulating effect, for example. The fibres store heat in winter and emit heat in summer. The hollow fibres also absorb and dissipate humidity. Alpaca wool is anti-static, which means it does not become charged. It also has an antibacterial effect and neutralises odours. Origin: Switzerland.

VIRGIN SHEEP'S WOOL

Merino sheep are part of the group of fine-wool sheep. No other material displays as many exceptional properties as extremely fluffy virgin wool from Swiss sheep. Virgin wool keeps you warm in winter and cool in summer because 85% of the curly wool fibres consist of air that has an insulating effect and makes the wool highly breathable. On hot days, virgin wool supports humidity regulation, as it can absorb up to 35% of its own weight in moisture without feeling moist itself. Virgin wool neutralises odours and pollutants and has a soothing and anti-static effect. Origin: Switzerland.

ECO FIBREFILL

Eco fibrefill is vegan climate fibre made out of 100% recycled PES. This hollow fibre, which is slightly curled, transports humidity and has a climate-control effect. It is washable at up to 60°C and is therefore perfectly suitable for people with asthma and allergies. Origin: Germany.

Your sleep solution

We spend a third of our lives asleep. This means that it's essential to find the perfect combination of mattress, system frame, duvet and pillow for your sleeping style. Our checklist and our product recommendations based on the Body Mass Index (BMI) will help you to choose your ideal bed.

PUT IT TO THE TEST

1. Allow plenty of time for purchasing your mattress, and seek advice from the experts.
2. Test the mattress by starting off in your normal sleeping position. Move around a bit, and try lying on your side, back and stomach.
3. When it comes to choosing a mattress and system frame, the particular features of your body shape are especially important factors. Make sure that the mattress supports your spine in its natural form. If you sleep on your side, the ideal position is a completely straight spine. If you're a back sleeper, you will want to make sure that the natural, slight S-shape of the spine is preserved.

Correct. The spine forms a straight line when you are lying on your side. The mattress and system frame adapt to your body.

4. Optimum strain relief is especially crucial. Pressure, for instance on your head, shoulders, pelvis or heels, is especially great when you are lying down. A good mattress yields at these pressure points, while continuing to provide even support for all other parts of the body. When you lie down, your body weight is distributed across the full extent of your height and width. Optimum pressure distribution is achieved when mattress materials with high point elasticity and a strong supportive effect are used to improve sleeping comfort.

Incorrect. Left: mattresses with low point elasticity form depressions and provide inadequate support for the body.

Correct. Right: mattresses with high point elasticity only yield at the points where pressure is exerted while you are lying down, softly moulding themselves to the body.

5. Do you sleep on your back? Place your hand beneath your back. If this is too easy to do, the mattress is too hard and is causing your spine to stretch unnaturally. The mattress is not moulding itself to you enough and is not distributing your weight over the entire surface of your body. Pressure points develop and the blood circulation in your skin and the underlying tissue is impaired, as are metabolic processes and cell renewal. If your hand won't fit underneath at all, the mattress is too soft. It does not provide sufficient support and your spine is being compressed.

Correct. When you are lying on your back, your spine is supported in its natural, slight S-shape. The mattress and the system frame ensure there are no pressure points on the body.

6. If you sleep on your side, your shoulders have to be able to sink into the mattress so that it can properly accommodate your pelvis. Your spine forms a straight line when you are lying on your side. If your spine sags down, you are not getting enough support and the mattress is too soft. If your shoulders cannot sink in, the mattress is too hard and pressure points will develop.

Incorrect. If the mattress and system frame are too hard, the spine is bent in an unnatural shape and pressure points develop.

Incorrect. If the mattress and system frame are too soft, the spine sags down and does not receive adequate support.

7. Do you run hot or cold at night? A crucial element of a comfortable sleeping environment is the climate-regulating properties of the mattress materials and cushioning, as well as the duvet. Even while you sleep, your body tries to keep its temperature at around 37 °C. In addition, even if you don't sweat much, your body loses around ¼ to ¾ of a litre of moisture via the skin and the breath. Heat and moisture have to be drawn away through the duvet and the mattress so that you are not disturbed during the night by an excessively hot and damp environment. Make sure to choose open-pored, air-permeable mattress materials and natural cushioning elements that regulate the temperature and moisture levels.

Correct. Open-pored and breathable mattress materials, natural cushioning and a climate-regulating duvet ensure optimum air circulation and a dry and healthy sleeping environment.

8. Allergy sufferers should opt for removable mattress covers that can be washed or chemically cleaned. Our GrandeHygiène mattresses offer considerable benefits: rovia Silverskin^{Ag} prevents the proliferation of dust mites and the allergens they produce. Its natural protection against mites and bacteria prevents fungi and unpleasant odours. This mattress version is washable at up to 30 °C. The HypoAllergen model, with synthetic hollow-fibre cushioning, is also washable at up to 60 °C and is recommended for allergy sufferers. For hygienic and ergonomic reasons, we recommend that allergy sufferers replace their mattress every 7 to 10 years.

PLEASE MAKE A NOTE OF YOUR PERSONAL CHARACTERISTICS BEFORE CHOOSING A MATTRESS:

- Your body weight, height and stature
- Your preferred sleeping position (on your side, front or stomach?)
- Your temperature level (do you get cold or hot while you are asleep?)
- Your health concerns, e.g. allergies and other conditions (are you an allergy sufferer? Do you have tension in your back?)

We're here to help
