

For a natural night's sleep

Producing beds that promote healthy, natural sleep.

As a maker of exceptionally comfortable beds, rovida is one of Switzerland's few remaining independent family firms in the sector. Since 1748, the company has applied its passion and technical skill to the production of mattresses and sleep systems of outstanding quality, giving it a full 270 years of expertise in the field. For rovida, Swiss-made is a quality promise that the company lives by every day. At its Wangen an der Aare production plant, high-quality – and high-value – Swiss products are manufactured for the most demanding of requirements. Its innovative mattresses, system frames and beds add real value in terms of a healthy and natural sleeping experience. The company's specialities include the processing of luxurious natural

products such as pure Swiss sheep's wool, fluffy baby camel hair, and the finest Tussah silk, helping to create a well-balanced sleeping environment. The carefully calibrated mattress cores made from 100% natural latex or Porotex have been developed to support or relieve the body wherever necessary. This approach is reflected in rovida's slogan: «It's time for a comfortable sleep – with rovida.» ☺

1) The new, natural rovida sleep system was honoured with the Red Dot Design Award 2018. 2) Peter Patrik Roth represents the ninth generation of his family to lead rovida.
